

Hint #3 – Education & Help

Crate Pro 5 provides a great deal of education and ‘How To’s’

Click on the **Diagrams** tab

Along the top of this window are tabs, each providing great information!

- **Crate pro Styles** – More information about the styles
- **ASTM & MIL Spec Styles** – the styles named by ASTM and the military with the corresponding Crate Pro Style
- **Rules** – What are the rules? How do they apply?
- **Closure** – On a Design you can specify the closure condition for your assemblers
- **Packing** – Deals with case lining, padding, wrapping and floater decks
- **Dimensions** – How are inside and outside crate dimensions determined? What’s involved with content dimensions?
- **How To...** - How to attach cleats, stitching, other fasteners. When are joist supports used. What are the sizes.
- **HELP (Also available on all other screens)** – This window includes tabs that offer an overview of the program, access the Manual and Getting Started Guides, a link to crating standards, quick view of what the icons mean in CP5, FAQs and Support

* The link to www.woodencrates.org provides access to a great deal of additional information about the industry. This site will be going through some major changes over the next few months to make it very friendly, not only to the members of the crating community but to end users looking for crate companies. Make sure your company is listed in the “Find a Crater” section.
